Contactless Control System

MLX 90614

- 4.5V~5V power supply Small size, low cost
- I2C interface
- temperature range: -40…+125°C for sensor temperature and -70…+380°C for object temperature.
- High accuracy of 0.5°C over wide temperature range (0…+50°C for both Ta and To) High (medical)
- Customizable PWM output for continuous reading Simple adaptation for 8-16V applications Sleep mode for reduced
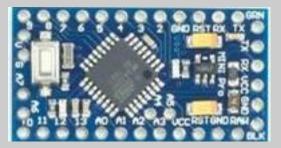

Selecting Development Board

Arduino Pro Micro

Arduino Nano

Arduino Pro Mini

Selecting Display

- SSD 1306 OLED

- TFT touch displays

- Nokia 5110

- Epaper display

Thank You
